

I would like to voice my opposition to rule changes on increasing the amounts of media ownership. I would hope the FCC would listen to citizen comments as part of the voting process as the FCC and other government officials are in place to REPRESENT these american citizens and to allow greater time for public comment and media coverage of this important topic which has not been covered much thus far but has major ramifications on limiting the diversity of delivery while allowing limited numbers of media companies to control much of what gets broadcast.

Sincerely,

Pat McCarthy
